

Project Manager (PM)

Job Description

Company Description

Caracol offers extreme, Additive Manufacturing, solutions with no scale limits to companies in different industrial sectors.

The company has developed its own Large-Scale Additive Manufacturing Robotic system, that with a patented extrusion head, proprietary algorithms and the use of robotic arms, can manufacture advanced components with no limits in scale. The flexibility of the robotic system allows not only to manufacture very large-scale parts but also complex geometries and parts with improved mechanical performance. Caracol provides a solution that saves production costs, reduced production lead time, and limits production waste to a minimum and can reutilize the waste produced.

By using a direct printing system, Caracol works with a wide variety of advanced composite materials – mostly techno polymers like PP, PPS and PA12 reinforced with fibers like carbon and glass. Thanks to our deep know-how and strategic partnerships with material producers, our Design & Engineering team identifies the best fitting material and technology to manufacture our client's applications.

Caracol's team combines a deep expertise in generative design and additive manufacturing, with an extensive knowledge of the industrial goods sector. Using very advanced design and analysis tools to optimize design for additive manufacturing according to the required performance. We work with clients accompanying them throughout the production process, supporting them by facilitating their getting to know the technologies and the opportunities of Additive Manufacturing.

We have been working with customers from industries such as Automotive and Motorsports, Aerospace and Defense, Industrial Machinery, Medical Devices, Design and Architecture. We offer our clients a broad range of solutions: from design and concept development, engineering components for AM production, manufacturing prototypes and pre-series with no limit in scale, line production of finished parts, as well as support in internalizing 3D printing technologies, 3D printing training and workshops and more.

Caracol has just closed a 3.5M Euros funding round with 2 Venture Capital Funds and several top tier business angels and it is now launching an ambitious growth plan to consolidate its role as leader in the Large-Scale Additive Manufacturing industry.

Job Type

- Full time
- Salary will be determined during the interview phase

CARACOL

Main activities

- Assist and support the commercial team on the sales and acquisition activities for complex projects
- Coordinate and integrate the communication and information exchange between the commercial and operational departments
- Organize and manage time schedules and Gantt's for monitoring on-going project activities
- Ensure on-time delivery of projects and keep constant contact with customers regarding progress
- Ability to manage the communication and handle any problems with customers (e.g., delay in delivery, ...)
- End-to-end management of the order development process
- Knowledge of manufacturing processes, both traditional and innovative, and ability to intercept problems and find solutions
- Knowledge of industrial sectors, preferably with a focus on the automotive, aeronautical and aerospace sectors
- Support to of customer management activities

Operational Skills Required

- Degree in Engineering (e.g., Mechanical, Aerospace, Materials or Management Engineering)
- At least 2 years working as project management or in a similar role
- Strong interest and passion for the world of 3d printing
- Knowledge of CAD software for 3d modelling
- Basic knowledge of the main 3d printing techniques (FDM and SLA in particular)
- Strong capacity for structuring processes and planning activities
- Fluent in English

Soft Skills required

- Ability to relate with customers and team members
- Excellent organizational skills
- Strong proactivity, flexibility and resourcefulness
- Problem Solving

Place of work

- Via Bellisario 6C, 20825, Bellisario (MB), Italy
- Possibility of smart working (1/2 days a week)
